CONGRESSIONAL RECORD — SENATE

S 1667

We can achieve the goals of the Clean Water Act with the funds we have authorized, but we would make major sacrifices in water quality under the funding level proposed by the administration. My home State of North Dakota would lose \$4 million in the coming year under this proposal or more than one-third of its authorized share. Other States would incur proportionate reductions.

People in my State and in the rest of the country are depending on us to carry through on our commitment to clean water. I commend Senator LAUTENBERG for his timely and appropriate response to this unacceptable element of the President's fiscal year 1989 budget. ●

POLYGRAPH PROTECTION ACT

THURMOND AMENDMENT
NO. 1472

Mr. THURMOND proposed an amendment to the bill (S. 1904) to strictly limit the use of lie detector examinations by employers involved in or affecting interstate commerce; as follows:

At the appropriate place, insert the following:

Sec. (a) Congress finds that—

(1) the most abused drug in America is alcohol;

(2) alcohol use costs the American economy nearly \$120,000,000,000 per year, including increased medical expenses and decreased productivity;

(3) alcohol related traffic accidents claim over 23,000 lives each year in the United States;

(4) over 12,000,000 American adults have one or more symptoms of alcoholism, representing an 8.2 percent increase in problem drinking since 1980;

(5) since 1981, the Surgeon General has officially advised women to abstain from drinking during pregnancy, and despite this warning, fetal alcohol syndrome is the third leading cause of birth defects with accompanying mental retardation;

(6) fetal alcohol syndrome is the only preventable birth defect among the top three types of birth defects in the United States, nevertheless, recent surveys reveal that only 57 percent of Americans have heard of fetal alcohol syndrome;

(7) nearly one-half of all accidental deaths, suicides, and homicides are alcohol related, and nearly half of the convicted jail inmates were under the influence of alcohol when they committed the crime;

(8) among teenagers, alcohol abuse has reached epidemic proportions and an estimated 30 percent or 4,600,000 adolescents experience the negative consequences of alcohol use (such as poor school performance, trouble with parents, or trouble with the law);

(9) in 1986, alcohol remained the most widely used drug among American youth;

(10) the Public Health Service has recently completed a study on the potential educational effects of health warning labels on alcoholic beverages and concluded that such labels can be effective in increasing consumer knowledge and can have an impact on consumer behavior, particularly in combination with other educational initiatives;

(11) the statistics cited in the preceding paragraphs indicate that many Americans are not aware of the adverse effects that the consumption of alcoholic beverages may have on health;

(12) it is necessary to undertake a serious national effort to educate the American people concerning the serious consequences of the consumption of alcoholic beverages; and

(13) warning labels on the containers of alcoholic beverages concerning the effects on the health of individuals resulting from the consumption of such beverages would assist in providing such education.

(b) Title V of the Public Health Service Act is amended by adding at the end thereof the following new part:
